

AMX Mobile helps your business to save time and money. Using handheld devices to support inspections, maintenance, on-call response and inventory collection, AMX Mobile can help to streamline your processes and increase efficiency.

Pinpoint yourself and any defects using GPS and integrated GIS maps.

Simple, quick, effective and portable.

How AMX Mobile can help

Wherever your team are, using handheld devices they can carry out their work, accessing the latest data while working on a user-friendly, customisable interface. Here are just some of the ways AMX Mobile can help you to streamline your processes:

- ▶ **AUTOMATIC, QUICK AND SEAMLESS DATA TRANSFER** with each device being attributed to an owner or role, such that records are automatically sent to the relevant device based on assignment. Wherever the user has connectivity, they can synchronise the device, transferring complete records and downloading new actions.
- ▶ **REACT QUICKLY AND EFFECTIVELY** to customer calls, inspection findings and incident reports sending works orders or inspection requests straight to the relevant staff/team device without them ever needing to return to the office. Even send automated e-mail updates to the customer if required.
- ▶ **MAKE OPTIMAL USE OF YOUR RESOURCES** allowing inspectors in the field to display all assets in their vicinity and thus record issues associated with another department's resources, such as a loose bollard cover, which can be sent directly to the relevant department for action.
- ▶ **CREATE ACCURATE, COMPREHENSIVE RECORDS** to support planning, with fully customisable forms, your field workers can capture all the latest relevant information; adding images, using user-defined dropdown boxes to classify attributes and recording accurate location details using GPS and GIS maps.

To arrange a demonstration of AMX Mobile for your organisation call 0333 456 0768 or email info@amxsolutions.co.uk

Bristol & Bath Science Park, Dirac Crescent, Emersons Green, Bristol, BS16 7FR
