Technical Requirements and Customer-Side Requirements

The following outlines the minimum specification required to support AMX operations:

Dedicated Server (On-Premise)

Web Application

- Modern Browsers supported: Chrome, Edge, Microsoft Edge (Chromium), Firefox, Safari.

Web Application Server

Processor: x64 Processor 3.2 GHz +

- Memory: 8 GB +
- MS Windows 2016 Server or above
- IIS 10 or above
- .NET Framework 4.8

Microsoft SQL Server

- Processor: 3.2 GHz +
- Memory: 8 GB +
- HDD: As a guide, a new installation with initial data import is approximately 200Mb, and standard usage increases this by less than 1 GB per annum.
- MS SQL Server 2016 or above (Also Express Versions)

AMX Web Service Server (Optional)

- Processor: 3.2 GHz +
- Memory: 8 GB +
- MS Windows 2016 Server or above
- IIS 10 or above
- .NET Framework 4.8 or higher

AMX Mobile Web Service Server (Optional)

- Processor: 3.2 GHz +
- Memory: 8 GB +
- HDD: Size of the web service is approximately 100MB plus additional storage for mobile data storage. Mobile files are generally 1-5MB per inspection recorded*
- MS SQL Server 2016 or above (Also Express Versions)
- IIS 10 or above
- .NET Framework 4.8 or higher
